

AFT-3X

3X Thermal Afocal Lens

The 3X thermal afocal lens from Nivisys delivers instant magnification to a number of Nivisys thermal products. Designed specifically for the TAM-14 thermal monocular (shown above), the magnifier features a rugged design that stands up to diverse applications and military specifications to deliver the highest performance.

The lens is quickly attached and removed by precision cut threads insuring a tight fit, clean design and secure feel. The lens has proven to adapt to thermal devices other than the Nivisys brand which makes it a good choice when considering a magnifier for your thermal system. Nivisys engineers have designed adapters for such applications and can custom design adapters to fit your specific product if needed.

The 3x thermal magnifier comes standard with a soft carrying case, eyepiece cap (for when unit is not in use) and objective lens cap.
