

NIGHT HAWK™

4X and 6X Night Vision Weapon Sight (NVWS)

The Night Hawk Night Vision Weapon Sight represents the latest in military night vision technology for medium and heavy weapon applications. Using either GEN II or GEN III image intensified technology, the Night Hawk is extremely rugged and reliable.

Due to the simplified reticle projection and parallax control, the Night Hawk is the most accurate night vision weapon sight currently available in mass production. Designed to meet military requirements for long-range accuracy, the Night Hawk can be mounted on a wide variety of individual and crew-served weapons.

The weapon sight has a variable brightness reticle that can be boresighted to the weapon using the independent windage and elevation adjusters.

Export of the commodities described herein is strictly prohibited without a valid export license issued by the U.S. Department of State, Directorate of Defense Trade Controls as proscribed in the International Traffic in Arms Regulations (ITAR), Title 22 Code of Federal Regulation, Parts 120-130.
