

# NVAG-6™ KIT

Rev. 21 Mar 2013

## Night Vision Aviator Goggle (LESS IMAGE TUBE)

### DESCRIPTION\*

The NVAG-6 KIT consists of a lightweight binocular, which can be mounted to a variety of helmets using the mounting adapter. Simple to operate, the system is powered by a dual-compartment battery pack that provides the pilot with immediate reserve power. The power pack uses AA alkaline batteries (provided).

The NVAG-6 KIT can be fitted with a range of image intensifier tube performance levels. These specifications can offer great performance for the user, regardless of the light levels. For domestic use the NVAG-6 is equipped with DO-275 specified class B coatings on the objective lenses.

The 27mm eye-relief eyepieces consistently provide high quality 40° field of view imagery regardless of exact eyepiece positioning. The binocular provides individual interpupillary adjustment, fore, aft and tilt adjustments. Constructed out of aluminum, the NVAG-6 can withstand the constant vibrations and environmental beatings connected with military operations.
