DESCRIPTION*

Nivisys offers the PVS-14A monocular in a kit configuration without an image intensifier tube. It is a U.S. Military battle proven night vision device. When equipped with a GEN II or GEN III high-performance image tube, the PVS-14A is designed for the most demanding nighttime applications.

The PVS-14A features variable gain control to achieve the highest quality image resolution under varying light conditions and a high light cut-off sensor for image tube protection.

Lightweight and versatile, the PVS-14A can be hand-held, head-mounted, helmet-mounted, camera/camcorder adapted or weapon-mounted as a tactical night scope. The PVS-14 is the most widely fielded night vision system available.

For more information on the PVS-14A KIT or other Nivisys products call (480) 970-3222 or visit us on the web at www.nivisys.com.
